DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: Regarding claim 1, the prior art of record, Takahashi (US 2002/0137529) teaches a storage to store a plurality of images (Sections 0030, 0055-0058); a reception unit 110 and 112 (Fig. 3, Sections 0036 and 0051) configured to receive plural image acquisition requests per second S507-S515 (Figs. 5 and 6 and Section 0077, it receives multiple image requests at once which can be timed at a second) within a predetermined time S508, S512 and S513 (Figs. 5 and 6), the requests being transmitted from another wireless communication apparatus in accordance with a camera control protocol for exchanging information relating to images (Sections 0051-0062); a selection unit S516 or S516A (Fig. 6) configured to select, in response to the image acquisition requests S507-515 (Figs. 5 and 6), one of the plurality of images stored in the storage (Sections 0030, 0055-0058) and to output information relating to the one of the plurality of images until the predetermined time elapses S512, S513, and S518 (Fig. 6); and a transmission unit 110 and 112 (Fig. 3, Sections 0036 and 0051) configured to transmit at least one response to the another wireless communication apparatus 300 (Fig. 4) in accordance with the camera control protocol, where information relating to the one of the plurality of images that is selected by the selection unit is contained in the response S517 and S518 (Fig. 6 and Sections 0051-0063), the selection unit selects an identical image S514 (Fig. 6, same as thumbnail picture requested) that is identical to an image selected responding to the first image acquisition request, the identical image being

selected responding to the second image acquisition request S514 (Fig. 6, same as the other thumbnail requested), and outputs information relating to the identical image, and the transmission unit transmits a response containing the information (Sections 0058-0059, transmitting the multiple images onto the user's image display) relating to the identical image, in response to the second image acquisition request.

The prior art of record fails to teach a wireless communication apparatus, comprising: a storage to store a plurality of images; a reception unit configured to receive plural separate image acquisition requests per second transmitted from another wireless communication apparatus in accordance with a camera control protocol for exchanging information relating to images; a selection unit configured to select, in response to the image acquisition request, one of the plurality of images stored in the storage and to output information relating to the one of the plurality of images; and a transmission unit configured to transmit at least one response to the another wireless communication apparatus in accordance with the camera control protocol, where the information outputted from the selection unit is contained in the response, wherein when the reception unit has received a first image acquisition request and a second image acquisition request in a predetermined time which is shorter than at least one second after receiving the first image acquisition request, the selection unit selects an identical image that is identical to an image selected responding to the first image acquisition request, the identical image being selected responding to the second image acquisition request, and outputs information relating to the identical image, and the transmission

unit transmits a response containing the information relating to the identical image, in response to the second image acquisition request.

The prior art of record fails to teach the claimed subject matter as claimed and substantially connected in claims 1-8

Regarding claim 9, method claim 9 is allowed for the same reason as apparatus claim 1 since the recited elements would perform the claimed steps.

The prior art of record fails to teach the claimed subject matter as claimed and substantially connected in claims 9-16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
